

▼ COPPER FEEL

Keir Townsend has collaborated with an Italian manufacturer to produce pieces of designer furniture that not only create a focal point, but are almost certain to be collectables of the future. The unique process of metal cladding entails applying strips of different metals to wood surfaces of the furniture. The metals can be patinated to different degrees creating a great variation of colour. Ideal for both contemporary and classic homes, the Stars Collection of metal-clad furniture is very on-trend at the moment with copper – in particular – enjoying a resurgence of popularity for cutting-edge interior schemes. The sideboard is priced at £7,900 (exc VAT).
