Why not use lighting to accentuate a focal feature in your bathroom? Here, interior designer Irina Townsend of Keir Townsend uses LED lighting to dramatically illuminate this recycled glass basin. The basin is lit from beneath with warm light creating a rich, intriguing effect. The recycled glass basin is available in a variety of other colours. Basin from £1,500; taps from £1,250; wall tiles from £120 per square metre. keirtownsend.com
