## Across the Divide

Launched at the Milan Furniture Fair this month, Division by Calligaris offers a stylish solution to living space storage. Its modular units come in a variety of configurations and coloured aluminium boxes can be inserted to create a bespoke look.

## A Platform for Art

The newly opened Toledo metro station in Naples, designed by Catalan architect Oscar Tusquets Blanca, features thousands of blue Bisazza mosaic tiles to create a stunning visual impact.

Designed with numerous shades of blue mosaics, the open space reveals an ocean ambiance. The station is part of Napoli's Metro Art station circuit and hosts a series of installations signed by notable artists William Kentridge, Bob Wilson, and Achille Cevoli.

## STRIKING SURFACES

Keir Townsend has introduced a new range of recycled glass surfaces. Available in several colours, the surfaces are suitable for a range of applications including worktops, shelving and splash backs. They are also translucent so can be lit up from underneath to create an eye-catching effect.
